

I am 90 years old. I have had the dizziness since 1990. I have been to 4 neurologists before Dr. Sanders. I had at least 3 MRI's. All of the doctors told me the same thing except the first one. We could do surgery but it could bring on a stroke and we don't know that we could find anything wrong. If I am going to have a stroke I am not going to have surgery to bring it on. The first doctor said everybody has this. It will leave in 6 weeks. The 6 weeks was over the next day. Two doctors told me about Dr. Sanders last year. I thought he won't see an 89 year old lady. My doctor sent my history to Dr. Sanders and they contacted me. I have never met so many lovely people in my life. Everyone is professional and so gracious. They know their job and do it. The audiologist explained what was going to do she did it to be sure you understand. Stephanie Ford explained the exercise before we did it. She is wonderful. I asked how the doctor was so fortunate to have such lovely people working for him. She said I would have to ask him. I have not had a bad dizzy spell since working with Dr. Sanders.
