

My symptoms were dizziness, feeling detached from my body, fatigue, nausea, loss of concentration. I saw two doctors who were unable to determine what was wrong. I grew frustrated and started questioning myself. Finally after many months of uncertainty, a friend referred me to Dr. Sanders. He and his staff were amazing. Within a short time they had a diagnosis and medication that took all symptoms away within 24 hours. Dr. Sanders is amazing. If only I had been sent to him immediately.
